PALLA SIVA SAI

+91-6281880058 | sivasaipalla1@gmail.com | linkedin.com/in/sivasaipalla | github.com/Sivasai517

PROFESSIONAL SUMMARY

Results-driven Data Analyst skilled in SQL, Power BI (DAX), Python, and Excel with experience in data cleaning, exploratory data analysis (EDA), and dashboard development. Built interactive dashboards and analytics solutions that improved business decision-making and operational efficiency by 15–30%. Experienced in transforming raw data into actionable insights through data visualization, statistical analysis, and KPI reporting.

TECHNICAL SKILLS

Languages & Querying: SQL (MySQL, SSMS – query writing, optimization, aggregation), Python
Python Libraries: Pandas, NumPy, Matplotlib, Scikit-Learn
Visualization & BI: Power BI (DAX, KPI dashboards, interactive reports), Microsoft Excel (pivot tables, advanced formulas)
Analytics: EDA, Data Cleaning & Transformation, Statistical Analysis, Data Validation & Quality Checks
Tools: Jupyter Notebook, Google Colab, Git, AWS Cloud (Fundamentals)

KEY COMPETENCIES

- **Data Cleaning & Transformation:** Performed data cleaning and transformation using Python (Pandas, NumPy) and SQL to prepare datasets for accurate analysis and reporting.
- **Exploratory Data Analysis:** Conducted EDA using Python and Jupyter Notebook to identify patterns, trends, and key business insights.
- **Data Visualization & Reporting:** Developed interactive Power BI dashboards with KPI tracking and DAX calculations to support data-driven decision making.

PROFESSIONAL EXPERIENCE

Data Analyst Intern *Apr 2024 – Jun 2024*
SlashMark IT Solutions – Remote

- Analyzed pizza sales data with SQL & Excel; identified top-selling products and customer patterns, driving 15% sales efficiency gain via optimized inventory management.
- Built Power BI dashboards with DAX to visualize sales trends, customer segmentation & revenue KPIs — boosting stakeholder decision-making efficiency by 30%.
- Optimized SQL queries (joins, CTEs, aggregations) to extract and transform data from multiple sources for actionable business insights.

Data Analyst / Python Intern *Jun 2024 – Sep 2024*
CodeTech IT Solutions & Alfido Tech – Remote

- Built Python apps (Student Grade Tracker, Color Detection) using Pandas & NumPy; cut manual errors by 80% and improved accuracy by 30%.
- Automated repetitive data workflows via Python scripts, reducing execution time by 20%; documented workflows in Jupyter Notebooks for reproducible reporting.

DATA ANALYTICS PROJECTS

HR Analytics Dashboard | *Power BI · DAX · SQL · Python · Excel* *Nov 2024 – Jan 2025*

- Interactive Power BI dashboard with DAX analyzing attrition, salary distributions & performance across 1,400+ records; identified 22% higher turnover in key departments.
- Performed EDA and data cleaning in Python (Pandas) & SQL; ensured data accuracy through rigorous validation before stakeholder publishing.

Sales Analytics Dashboard – Blinkit | *Power BI · DAX · SQL · Excel* *Jul 2024 – Sep 2024*

- Developed an interactive Power BI dashboard to analyze $1.2M revenue, 8,523 items sold, and a 3.9 average rating, enabling real-time monitoring of key sales KPIs.
- Used SQL queries and DAX calculations to evaluate sales performance across outlet types and product categories, supporting data-driven pricing and inventory decisions.

Urban Data Analysis | *SQL · Excel* *Feb 2026– March 2026*

- Analyzed urban development and population datasets to identify trends in population growth and infrastructure usage.
- Built interactive Excel dashboards using pivot tables and charts to visualize key urban metrics and support data-driven planning.

Nutrient Efficiency Detector | *Machine Learning · Numpy · Python · Pandas* *Aug 2025 – Dec 2025*

- Developed a nutrition analysis system to evaluate daily food intake and calculate essential nutrients such as calories, carbohydrates, proteins, and fats using Python.
- Performed data preprocessing and exploratory data analysis (EDA) on food nutrition datasets using Pandas and NumPy to understand dietary patterns.
- Built a recommendation model that suggests suitable food items based on nutritional requirements, helping users maintain a balanced and healthy diet.

EDUCATION

B.Tech – Computer Science & Engineering (Data Science) *Jun 2022 – May 2026*
Madanapalle Institute of Technology and Science, Andhra Pradesh | CGPA: 8.5/10

CERTIFICATIONS

Google Data Analytics (2023) | Data Analytics & Visualization – Accenture (2024) | Data Analysis with Python – IBM (2024) | AWS Cloud Fundamentals (2024) | Deloitte Data Analytics Simulation – Forage (Feb 2026)
